Skills & Programming Language Proficiencies

Competent in: • Rust • Common Lisp • Linux Environments • Technical Documentation Writing

Currently learning: • Bash Scripting • TypeScript • SQL • More Rust

Some knowledge of: • C++ • Java • Python • Git

Notable Projects

- Parsers for UDP, TCP, SCTP, and DNS packets

All implemented as specified in their corresponding RFCs, with property testing, documentation, and error handling.

- Various Toy Networking Fundamentals Projects

Including a recursive DNS resolver, a reimplement of Ping and a minimal working version of the TCP Connection, Transfer, and Termination processes.

- Various Web Server Projects

Explorations into different tools and technologies, including the management of small databases; using async code; managing dependencies and build files; managing simple containers using Docker & Nix; compiling to Web Assembly, etc.

Education

M.A (First), Philosophy

King's College London, 2022

B.Sc (First), Computer Science with Intelligent Systems

King's College London, 2020

BTEC Level 3 Award in Networking and Architecture (Distinction)

Matthew Boulton College, 2017

Awards

Associateship of King's College, Award in Ethics & Theology

King's College London, 2022

O'Reilly Partnered Award for 'Most Insightful Statistics'

King's College London, 2018

Teaching Experience

Teaching Assistant for 'Computer Systems'

King's College London, Winter 2019
